**PIKES PEAK EDITION - EURO 4 EURO 4 HOMOLOGATED
FOR DUCATI MULTISTRADA 1200 E 1260**

In 2018, Carlin Dunne powered his Ducati Multistrada 1260 to victory in the famous Pikes Peak International Hill Climb, a race that twists and turns up the slopes of Pikes Peak, Colorado. The Termignoni Racing department played a part in this victory by developing a full titanium exhaust system. Sharing the same style of silencer, the new homologated Pikes Peak Edition silencer is the result of this experience and is now available for the Multistrada 1260 (versions: Basic, S and Pikes Peak) and Multistrada 1200 Euro 4 (versions: Basic, S and Pikes Peak).

The homologated D193 system stands out for the compactness of its silencer complete with titanium sleeve and carbon fibre endcap; the 70mm link pipe and carbon fibre heat shield are finished with a titanium plate engraved with the Termignoni logo and the iconic “Pikes Peak edition”. This system is compatible with the original side panniers and does not require any re-mapping of the ECU.
